Work Experience

Unity 3D Developer

Hydraulic Research Center-Havana

September 2023 to December 2023

The "Process Virtualization" research group is developing a new 3D version of the MultiH.Virtual, a virtual hydraulic laboratory. This will improve the user experience by being able to work in a 3D environment compared to the previous version which was in 2D.

We are a team of 3 students, including myself, who continue to develop the new version of MultiH.Virtual using Unity 3D and C#. At this stage my roles in the team are to continue developing and improving the user interface and the internal lab mechanics related with the lab practices.
